

About RGCIRC

Rajiv Gandhi Cancer Institute and Research Centre (RGCIRC) is a visionary project of Indraprastha Cancer Society, a not for profit public society managed by a group of socially responsible selfless philanthropists, aimed at providing best cancer care to those who need it. The vision of our founder members is "To prevent and treat cancer by providing affordable oncology care of international standards in India".

The philosophy of RGCIRC is to constantly strive towards excellence in cancer care through combination of latest technology, competent personnel and human touch. RGCIRC offers comprehensive services from prevention to palliation at an affordable price.

Nursing at RGCIRC has a proud reputation for providing specialized care and comfort to patients diagnosed with cancer. Oncology nurses work together closely with doctors to ensure patients and their families experience compassionate care as well as access to the latest cancer treatments. Oncology services also include access to support group and education programs to assist patients and their families.

We take care of all details to make sure that patients journey is as simple and stress free as possible.

**"Adult and Pediatric Hemato Oncology Nursing:
From Hope to Cure"**

**Hotel Crowne Plaza, Rohini, New Delhi
Saturday, 11th November 2017**

Invitation

With great pride and honor, The Department of Nursing at Rajiv Gandhi Cancer Institute and Research Centre (RGCIRC) Delhi, announces the one day CNE program on "Hemato Oncology Nursing: to be held on 11th November 2017 at Hotel Crowne Plaza, Rohini, Delhi - 85

The theme of the program is "Adult and Pediatric Hemato Oncology Nursing: From Hope to Cure"

The incidence of blood cancers in India has risen to 5.1 per 1, 00,000, while that of leukemia stands at 2.1. Although we are yet to identify the exact causes of the disease, lifestyle factors do seem to play an important role.

Leukemia, lymphoma, myeloma and Myelodysplastic syndromes (MDS) are types of cancer that can affect the bone marrow, the blood cells, the lymph nodes and other parts of the lymphatic system.

It is often said that nurses are the heart of health care. The field of Hemato oncology nursing, in particular, is probably one of the most challenging and rewarding fields in nursing. A hematology nurse works with patients suffering from blood disorders and cancer. The specialty is closely linked to oncology nursing, and hematology nurses work closely with fellow nurses, hematologists and physicians. Special skills and advanced knowledge are vital in this specialty, as is empathy and compassion. Regardless, if a hematology nurse chooses to focus on adults or pediatric patients, many will be facing terminal illnesses or life-threatening diseases such as hemophilia, sickle cell anemia, lymphoma and leukemia.

In this background, nursing oncology department of RGCIRC has planned the academic feast for nursing fraternity.

We cordially invite you to participate in the event and make the most use of the vast knowledge and experience of the learned faculty.

Please find attached registration form. You are requested to register early.

We look forward to maximum participation from your prestigious institute/Hospital in the program.

Thank You and Regards.

Ms. Kathleen Glenda Jacobs
Chief of Nursing

Ms. Victoria Massey
Deputy Nursing Superintendent

Key Topics

- Overview: Adult and child hood cancers
- Diagnostic tests
- Treatment modalities
- Hemato oncology emergencies
- Nurses role in care of hemato oncology patients
