Ethics: The Guiding Compass Behind Every Care Decision

At RGCIRC, ethics is not just a guiding philosophy; it is a responsibility that we carry in every interaction, every communication, and every decision. In healthcare, especially in oncology, patients and families place immense trust in the institution - the doctors, the care teams, and everyone else who represents the organisation. Upholding ethics ensures that this trust is reciprocated with honesty, fairness, sensitivity, and accountability.

For a patient, ethical care begins with being treated as a person first. That means receiving clear information about the treatment, support to overcome fear and anxiety, and being cared for with dignity, at every stage of the healing journey. It also reflects in the way conversations are held, how treatment choices are made, how privacy is protected, and how every concern is addressed with genuine sincerity.

Ethics also play an important role in the way we communicate as an organisation. Every message that goes out - whether to patients, caregivers, partners,

or the larger community - must be accurate, responsible, and compassionate. In healthcare marketing, this becomes even more important because communication is not just about visibility; it is about building trust, creating awareness, and helping people make informed decisions.

Across every department at RGCIRC, ethics show up in many quiet but meaningful ways. It is visible when information is shared with utmost transparency, when patient stories are handled with consent and great care, and when every piece of communication reflects the seriousness of healthcare and the commitment of our teams.

As we continue to grow and strengthen our work, ethics remains our guiding compass, helping us balance progress with responsibility, communication with sensitivity, and service with integrity. At RGCIRC, ethics is not separate from care; it lays the foundation of it. It reminds us that trust is built not through claims, but through honesty, consistency, and respect.

BREAKING BARRIERS IN WOMEN'S CANCER: FROM PREVENTION TO SURVIVORSHIP

On June 12, 2026, the Department of Preventive Oncology at Rajiv Gandhi Cancer Institute & Research Centre (RGCIRC) successfully hosted a continuing medical education seminar titled "Breaking Barriers in Women's Cancer: From Prevention to Survivorship" at Indraprastha Hall, Rohini, Delhi. The specialized event drew an active participation of 60 attending doctors focused on strengthening the cancer care continuum.

Following an opening welcome note by Medical Director Dr. Sudhir Rawal, the scientific sessions featured Dr. D. S. Gangwar on the integrated role of gynecologists in oncology care. Dr. Renuka Gupta detailed cervical cancer prevention, while Dr. Garima Daga shared vital insights into breast cancer early detection and survivorship. Dr. Vandana Jain addressed clinical roles in endometrial and ovarian cancers. Dr. Vishvak Chanthar then spoke on how early detection enables breast conservation through oncoplastic surgery, followed by Dr. Indu Aggarwal who highlighted the expanding scope of services within the Department of Preventive Oncology.

The seminar concluded with a formal Vote of Thanks, successfully fostering crucial clinical collaboration and updating community practitioners on modern diagnostic and surgical protocols.

CME WITH INDIAN MEDICAL ASSOCIATION (IMA) PANIPAT

RGCIRC (Rajiv Gandhi Cancer Institute & Research Centre), in association with the Indian Medical Association (IMA), Panipat, successfully organized an Oncology CME on 17th June 2026 at Hotel Hive, Panipat, Haryana.
